As we understand that the eProject is a step-by-step learning environment that closely simulates the classroom and Lab based learning environment into actual implementation. This is also the first eProject we received from India. This is a playground for all students to get closer together and unleash their full potential. Through this project, we can practice creating an actual website step by step. This requires us to apply the knowledge learned in class and learn new abilities to be close to reality. Difficulties and errors in the working process are inevitable. However, eProject gives us the following:

- ✓ Apply theory to practice and practice step by step.
- ✓ Build a more extensive, more robust application.
- ✓ Unleash the hidden potential in each individual.
- ✓ Single program to unified code leading to a complete application.
- ✓ Developing teamwork skills.
- ✓ Work on real-life projects.
- ✓ Give a real-life scenario and help create more complicated and valuable applications.

Thank you to our professor "Nguyen Thanh Nhan" for always guiding us every step of the way during the project. I have learned a lot from professional knowledge, research skills, professional, ethical values, and severe thinking in project implementation. He is not only a guide for research work but also someone who instills in us a high sense of responsibility, passion, and desire to progress in our field. The words of encouragement, comments, and suggestions from teachers have helped me to complete and improve the quality of the project. In addition, we also want to thank our classmates for their advice and support during the one month of the project. We also thank you so much for your information and the "demo" project from India APTECH to help us get a more realistic experience in this project. We hope to see you soon in the next project. I have learned a lot since doing this eProject. This will always be the luggage for us to continue pursuing the path of becoming a professional full-stack.

You are Sincere

Team Group No.04.

Synopsis

Our goal is to put what we have learned into practice. Using HTML/JAVASCRIPT tools, we can build a web profile of a particular individual. The website (in this project) is a tool that provides a full biography of Marie Curie - the famous scientist who won the Nobel Prize.

This website will provide all the information about life and what revolves around the main character. This website will help users understand all the information about celebrities and create a community for people to interact and exchange information, one of the crucial things we must focus on. Come to find out more about the issues related to this topic.

And get back to eprojects@aptech.ac.in as the assigned schedule.

Design Plan: Biography of Marie Curie	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 12-06-2023	Version 1.0	Page No: 1 of 16

Problem Definition

Famous people are people with many achievements and influence on society. So, biographies of famous people are also fascinating. In today's highly developed industry, we can use the Internet to learn about famous people. Therefore, the team wants to dissolve what they have learned about programming to create a website to collect and share information with readers. From the people's stories, our team wants to inspire so many people, helping everyone better understand their lives and the outstanding achievements they have brought to this world.

Celebrity Biography is the category that our team wants to aim for this project. And specifically, we are making a website about the Biography of Marie Curie - Winner of two Nobel prizes and the first woman ever to win a Nobel.

This website will be developed for the Windows Platform using HTML5, JavaScript, and Geolocation. The website will work fine in all the leading browsers, including Chrome, IE, Firefox, etc. Our website provides her personal information, books, and achievements... Our problem was finding a way to display the data in detail and succinctly—speakers' information on the display page. Then we must arrange the order on the navigation bar to make it easy for users to use. The interface on the website is also discussed and considered by us.

Design Plan: Biography of Marie Curie	Document Name: Customer Requirements Specifications	SWD/Form No.02/CRS/Ver1.0
Effective Date: 12-06-2023	Version 1.0	Page No: 2 of 16

Customer Requirements Specifications

User:

Input:

- Click on the sections on the navigation bar.
- Click on the images of books
- Enter keywords

Process:

- Navigate user to the destined links
- Navigate user to the Image url
- filter keywords within the webpage.

Output:

- Display the content of the links
- display content of the destined link
- highlight the filtered keywords.

Screen shots

Các layout mô tả màn hình. Sinh viên có thể vẽ layout. Nếu không thể thì code HTML cơ bản rồi chụp lại hình màn hình.

Ví dụ cách thứ nhất: (Khuyến cáo sử dụng)

I. Homepage:

Logo		Banner size x size	Banner size x size
Homepage	Categories	Register	About us
<div> <div><</div> <div>Services Carousel</div> <div>></div> </div>			
Enter text for searching:		<input type="text"/>	
		<input type="button" value="Click for seaching"/>	
Footer			

Description : Mô tả màn hình là gì? Dùng làm gì?

From : Được mở từ đâu? Menu nào?

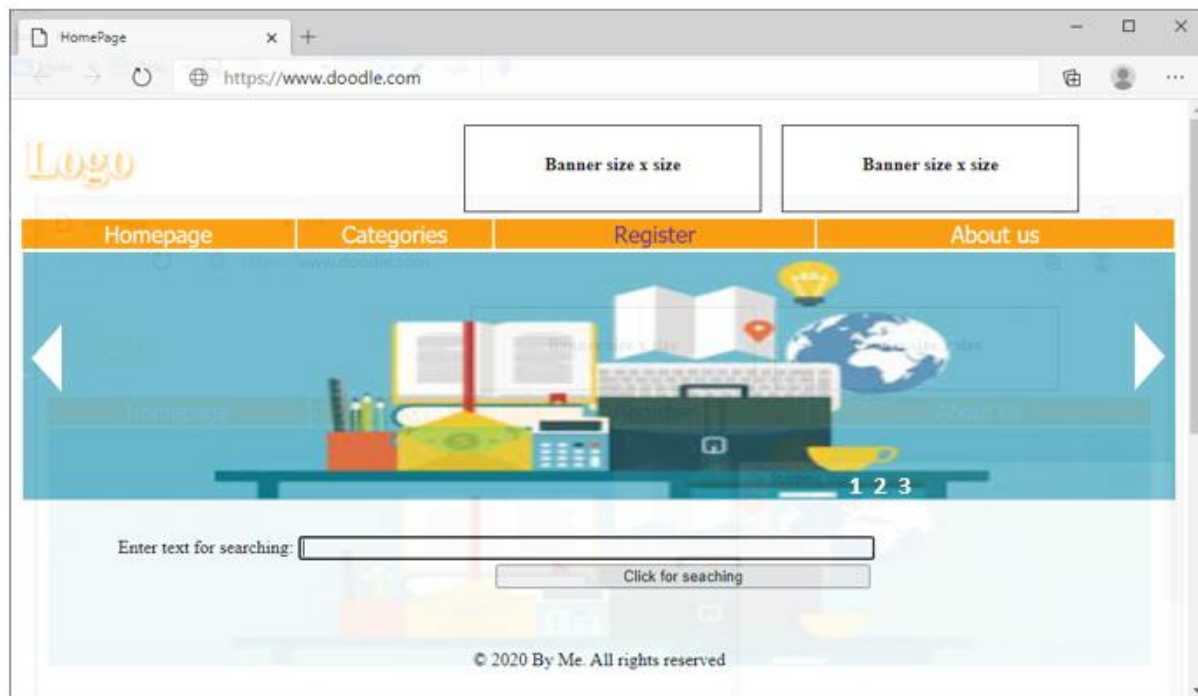

To : Có thể tới được trang nào khác?

Effective Date: 01-01-2002	Version 1.0	Page No: 10 of 16

Final checklist

Sr.No	Aspected Tested	Suggestion/ Remarks
1	Are all the users able to view the images and links?	
2	Have all the views, modules and controllers been properly integrated and is the site function as a single page application?	
3	Are the GUI content devoid of spelling mistakes?	
4	Is the application user-friendly?	
5	Is the Website launching correctly in all popular browsers?	
6	Are all the forms validated with proper criteria?	
7	Do all text links lead to the appropriate website?	
8	Do all image links lead to the appropriate website?	
9	Are all the images and links clearly visible on the page?	
10	Does the Web page work properly in all the tested browsers?	
11	Does the Web page take too long to be loaded fully?	
12	Is the navigation sequences correct through all the Web pages on the site?	
13	Is the JavaScript code working as expected in all click events?	
	(Sinh viên ghi thêm...)
